Shrinking inventory and shorter marketing times were key characteristics of the North Fork housing market in the second quarter. Listing inventory for the region declined 20.5% to 434 from the year ago quarter. A similar pattern was seen in the luxury market, which represents the top 10% of all sales. Luxury listing inventory fell 9.9% to 82 over the same period. Days on market, the average number of days from the last price change to the contract date, was 122 days, 35 days faster than during the year-ago quarter. The listing discount, the percentage

difference between the list price at the time of sale and the contract price, was 6.3%, down from 9.8% over the same period. There were 186 sales, up 3.9% from the year-ago quarter. As a result of rising sales and falling supply, the pace of the market accelerated. The absorption period, the number of months to sell all inventory at the current rate of sales, declined to 7 months from 9.2 months in the year-ago quarter. Overall price trend indicators moved higher. Median sales price increased 3% to \$551,000, and average sales price rose 4.6% to \$726,350 respectively

from the year ago quarter. Luxury price trend indicators, representing the top 10% of the market, followed a similar pattern. Luxury median sales price rose 9.9% to \$1,975,000, and average sales price increased 7.2% to \$2,162,789 respectively from the year-ago

quarter. The entry threshold into the luxury market slipped 3.5% to \$1,350,000 over the same period. There were 9 sales above the \$2 million threshold, nearly double the year ago quarter and the second most quarterly sales in more than 3 years. The remaining 90% of

the market, known as “non-luxury” showed similar upward price trends after removing luxury sales from the mix.
